Contents of Vol. 20, 1988

Preface vii

Section I: Experiments 1

Keynote paper:
Hazards and protection of pressure storage and transport of LP-gas
J.A. Davenport (Hartford, CT, U.S.A.) 3

Papers:
Heat transfer to large objects in large pool fires
B.L. Bainbridge and N.R. Keltner (Albuquerque, NM, U.S.A.) 21

Full scale fire tests with unprotected and thermal insulated LPG storage tanks
B. Droste and W. Schoen (Berlin) 41

Fire engulfment tests on a 5 tonne LPG tank
K. Moodie (Harpur Hill, U.K.), L.T. Cowley, R.B. Denny, L.M. Small and I. Williams (Chester, U.K.) 55

Investigations of water spraying systems for LPG storage tanks by full scale fire tests
W. Schoen and B. Droste (Berlin) 73

Section II: Modeling and Experiments 83

Keynote paper:
Analysis of the LPG-disaster in Mexico City
C.M. Pietersen (Apeldoorn, The Netherlands) 85

Papers:
Assessment of mathematical models for fire and explosion hazards of liquefied petroleum gases
W.P. Crocker and D.H. Napier (Toronto, Canada) 109

Radiative interchange factors between flames and tank car surfaces
S. Wong and F.R. Steward (Fredericton, Canada) 137

Section III: Computer Modeling 147

Keynote paper:
Experiments and modelling: An overview with particular reference to fire engulfment
K. Moodie (Harpur Hill, U.K.) 149

Papers:
A description of the "ENGULF" computer codes - Codes to model the thermal response of an LPG tank either fully or partially engulfed by fire
P.K. Ramskill (Warrington, U.K.) 177

Modelling the response of tankers exposed to external fire impingement
A.M. Birk (Kingston, Canada) 197

Fire engulfment of LPG tanks: HEATUP, a predictive model
G.V. Beynon, L.T. Cowley, L.M. Small and I. Williams (Chester, U.K.) 227

Thermal response analysis of LPG tanks exposed to fire
N.U. Aydemir, U.K. Magapu, A.C.M. Sousa and J.E.S. Venart (Fredericton, Canada) 239

Section IV: Release 263

Keynote paper:
Managing overpressure - More than safety relief protection
F.C. Politz (Houston, TX, U.S.A.) 265

Papers:
A study of two phase critical pipe flow models for superheated liquid releases
B.C.R. Ewan (Sheffield, U.K.), K. Moodie and P.J. Harper (Harper Hill, U.K.) 273

Large scale propane release experiments over land at different atmospheric stability classes
M. Heinrich, E. Gerold and P. Wietfelft (Hamburg, F.R.G.) 287

The flammability of rich gaseous fuel mixtures including those containing propane in air
I. Wierzba, G.A. Karim and H. Cheng (Galgary, Canada) 303

Section V: Risk Assessment 313

Keynote paper:
Risk assessment and legislation
J.H. Shortreed and A. Stewart (Waterloo, Canada) 315

Papers:
An analysis of the risks arising from the transport of liquefied gases in Great Britain
G.Purdy, H.S. Campbell, G.C. Grint and L.M. Smith (Bootle, U.K.) 335

Risk assessment for installations where liquefied petroleum gas (LPG) is stored in bulk vessels above ground
G.A. Clay, R.D. Fitzpatrick, N.W. Hurst (Sheffield, U.K.), D.A. Carter and P.J. Crossthwaite (Bootle, U.K.) 357

Estimating the impacts of LPG spills during transportation accidents
M. van Aerde (Kingston, Canada), A. Stewart and F. Saccomanno (Waterloo, Canada) .. 375

Author Index of Vol. 20 393
